SUBJECT INDEX

A

Absorbing the technical trainee 462-464
Absorption of gases in metals 201
Acid electric steel foundry, Ladle refractories and practice in 546-554
Acoustical or ultrasonic tests 313
Air furnace melting 133
Air oxidation during induction melting of gray iron . . 476
Alloyed white iron, Isothermal transformation characteristics on direct cooling of 509-522
Aluminum bronze, Time required for, to solidify 395
Aluminum melting 139
Aluminum-silicon alloy composition 29
Modification of 28
A.F.S. Committee reports 79, 92, 99, 108
A.F.S. Fineness Number of Sand 117, 118
A.F.S. Research reports 67
American Society for Engineering Education 530
Anneal of black-heart malleable iron, Relative effects of chromium and silicon contents on rate of . . . 244
Annealing furnaces and atmosphere for malleable iron 494-500
Arbitration bars for gray iron testing 132,403
Austenite dendrite formation in gray iron 428
Austenite transformation data for alloyed white iron . . 513
Atmosphere:
and annealing furnaces for malleable iron . . . 494-500
for annealing malleable iron 494-499
gas samples of, over molten gray iron 474
Influence of, on molten gray iron 474

B

Baking, Core, oven 57-59
Baking, Dielectric core 159
Barrel-type furnaces for melting aluminum 142
Basic cupola melting 20
Basic cupola operation 328
Slag control in 323-331
Bench-type core blower 217
Binders, Resin core 160
Black-heart malleable iron, Relative effects of chromium and silicon contents on rate of anneal of . . . 244
Boiler drop plugs, Manufacture of bronze 296-299
Bottom-pour ladle performance 550
Bronze, aluminum, Time required for, to solidify . . . 395
Bronze boiler drop plugs, Manufacture of 296-299
Bronze, Temperature determination of molten 350
Bronze, Time required for, to solidify in sand and insulated cavity 395
Bronze, 88–8–4, Fracture characteristics and melt quality of 67
Bubbling air through molten iron 124, 126
Buckling in dry sand 458
Buckling in green sand 457

C

Calcium carbide, Desulphurization of gray cast iron with 286
Carbide stability in gray iron, Effect of alloying elements on 196
Carbon control in cupola 22
Carbon equivalent in gray iron 431
Carbon pickup in cupola 23
Carbon solubility in molten iron 26
Carburization in cupola operation 328
Castability and property comparison of several magnesium-rare earth sand casting alloys 532-545
Casting finish, Effect of sand grain distribution on . . 523-528
Cast iron:
Freezing of white, in green sand molds 488-493
gray, Machinability of high-phosphorus 282
Kinetics of graphitization in 181
Mo-Ni-Cr, Structure and mechanical properties of 353-359
nodular, Effect of phosphorus content on mechanical properties of a 501-508
Oxidation-reduction principles controlling composition of molten 121
Cast steel, Mechanical properties of, as influenced by mass and segregation 223
Charging arrangement for cupola 64
Charging magnesium alloys in furnace for melting . . . 146
Charles Edgar Hoyt lecture 1
Chemical composition and structure of gray iron, Some effects of temperature and melting variables on . 472-487
Chill:
amount of, Effect of composition of iron on 86
depth, Measurement of 86
depth of, Influence of melting conditions on 88
tests and the metallurgy of gray iron 79
Chill tests for gray iron 81
Chromium, Effect of, on annealing rate of malleable iron 244
Chromium-molybdenum steels, Effect of vanadium on properties of cast 261
Coke, Effect of, in melting gray iron 475
Coke Ignitor, Electric 65
Coke properties 22
Cold chamber die casting machine 398
Cold shuts in malleable castings 503
College graduate, What the, can do for the American foundryman 529-531
Composition studies of molding sands 291-295
Control, Slag, in basic cupola operation 323-331
Cooling curves of high purity 85–5–5–5 alloy 366
Copper alloys, Equipment for melting 465
Copper alloys, Refining secondary 465-471
Copper-base alloy, Effect of 2% nickel on 363
Copper-base alloys, Effects of certain elements on grain size of cast 360-371
Copper, Density of pure 395
Core baking, Dielectric 159
Core baking oven 57-59
Core binders, Resin 160
Core blower
Bench-type 217
Diaphragm-type 217
Draw-type 218
Core blowing machines, Design of core boxes and driers for use on 216
Core blows 302
Core boxes and driers, Design of, for use on core blowing machines 216
Core composition, Effect of, on metal penetration . . . 110
Core mixes, Resin 163
Core oil evaluation method 276-281
Core practice as related to malleable foundry losses . . 300-303
Core room mechanization 56
Core sand mixing procedure 415
Core sand mixtures 412-414
Core sand practice 412-417
Core scabs 301
Cores, drying of 10
Costs, Evaluating, in jobbing foundries 210
Crucible melting of magnesium 148
Crucibles for melting aluminum 144
Crystallography and metallography of graphite 182
Crystobalite in slag 128, 129
Cupola, Basic, melting 20
Cupola, basic, operation, Slag control in 323-331
Cupola charge 21
Cupola, charging, Arrangement for 64
Cupola dimensions, Production 21
Cupola, Metallurgical blast 25

Cupola slag analysis . . . 476
Cupola water cooling . . . 25

D

Defect, Scab, on gray iron castings . . . 99
Definitions
Thermal conductivity . . . 381
Research . . . 1
Riser efficiency . . . 393
Degassing copper-base alloys with nitrogen . . . 74
Density of pure copper . . . 395
Dephosphorization in cupola operation . . . 327
Design of core boxes and driers for use on core blowing machines . . . 216
Design of furnaces for melting aluminum . . . 140
Desulphurization in cupola operation . . . 21, 324-327
Desulphurization of gray iron with
basic-lined cupola . . . 286
calcium carbide . . . 286
Development program, U. S. Navy . . . 348-352
Diaphragm-type core blower . . . 217
Die casting magnesium alloys . . . 398-400
Dielectric baking equipment . . . 159
Dielectric baking of cores . . . 10, 159
Economics of . . . 163
Dilatometer tests on sand . . . 460
Dilatometric thermal analysis of cast steels . . . 262
Dimensional checking and pressure testing of gray iron castings . . . 304-308
Dimensional checking of unmachined castings, Fixture for 305
Dimensional variations in castings . . . 302
Direct cooling of alloyed white iron, Isothermal transformation characteristics on . . . 509-522
Dirt in malleable castings . . . 302
Distribution, Effect of sand grain, on casting finish . . 523-528
Dolomite, Calcined, in basic cupola . . . 24
Draw-type core blower . . . 218
Drier, Sand . . . 57
Driers and core boxes, Design of, for use on core blowing machines . . . 216
Driers and core plates for dielectric baking . . . 164
Drying of molds and cores . . . 10

E

Electric coke ignitor . . . 65
End effects on soundness of cast steel bars . . . 171
Equipment and methods of straightening and dimensional inspection of malleable iron castings . . . 418-424
Equipment for melting
aluminum alloys . . . 139
copper alloys . . . 465
Equipment for nondestructive testing . . . 309-314
Equipment, Mechanical, for medium-size gray iron foundry 56
Eutectoid reaction in gray iron . . . 189
Exchange papers
A.F.S. to IBF . . . 7
IBF to A.F.S. . . . 20
Australian Institute of Foundrymen to A.F.S. . . . 28
Swedish Institute for Metal Research to A.F.S. . . . 35
A.F.S. to French Technical Foundry Association . . 56
Exothermic riser compounds . . . 396

F

Fatigue data summary . . . 92
Fayalite in slag . . . 128
Feeding of nonferrous castings . . . 350
Fineness number of sand . . . 117, 118
Finish, casting, Effect of sand grain distribution on . 523-528
First-stage annealing of malleable iron . . . 244
Fixture for dimensional checking of unmachined casting 305
Foundry courses in high and trade schools . . . 332-336
Foundry losses, Core practice as related to malleable . 300-303
Foundry training course outline . . . 333
Foundryman, What the college graduate can do for the 529-531
Fracture characteristics and melt quality of 85–5–5–5 and 88–8–4 alloys . . . 67
Freezing of white cast iron in green sand molds . . . 488-493
Fuel-fired furnaces for melting aluminum:
Lift-out type . . . 140
Stationary, pot-type . . . 140
Tilting, pot-type . . . 140
Furnace design for:
annealing malleable iron . . . 494-496
heating sand test specimens . . . 453
melting aluminum . . . 140
Furnaces for melting aluminum:
Barrel type . . . 142
Fuel-fired:
Lift-out type . . . 140
Stationary, pot-type . . . 140
Tilting, pot-type . . . 140
Low-frequency induction . . . 143
High-frequency induction . . . 143
Reverberatory . . . 140
Tilting reverberatory . . . 142

G

Gas samples of atmosphere over molten gray iron . . . 474
Gases, Injecting, in molten metals . . . 205
Gases in metallurgy, Ill effects and usefulness of . . . 201
Grain distribution, sand, Effect of, on casting finish . . 523-528
Grain size of cast copper-base alloys, Effects of certain elements on . . . 360-371
Graphite, Crystallography and metallography of . . . 182
Graphite distribution in gray iron . . . 484
Graphitization in cast iron, Kinetics of . . . 181
Graphitization of cementite, Subcritical . . . 194
Gray iron:
Air oxidation during induction melting of . . . 476
castings, Dimensional checking and pressure testing 304-308
chill tests . . . 79
desulphurization with calcium carbide . . . 286
Effect of:
coke in melting . . . 475
iron oxide additions on composition of . . . 478
melting, under CO . . . 482
melting, under slags . . . 481
refractory type in melting . . . 476
steam treatment of molten . . . 482
foundry, medium, Mechanical equipment for . . . 56
Graphite distribution in . . . 484
Inclusions in . . . 131
Influence of type of slag over molten . . . 476
Machinability of high-phosphorus . . . 282
melt, Effect of rust on analysis of . . . 479
Metallographic examination of . . . 404-410
microstructure . . . 432
Solidification of, in sand molds . . . 425-434
Some effects of temperature and melting variables on chemical composition and structure of . . 472-487
Greco-Latin square . . . 253
Green sand molds, Freezing of white cast iron in . . 488-493
Gypsum riser sleeve, Use of . . . 350

H

Hardness of magnesium-rare earth alloys . . . 539
Heat and mass flow analyzer, Thermal studies with . . . 13
Heat flow in moist sand . . . 381-391
Heat problems in the foundry . . . 9
Heat transfer, Fundamentals of . . . 7
Heat transfer theory, Practical consequences of . . . 8
Heat transmission to sand mold . . . 52
Heat treatment of magnesium-rare earth alloys . . . 533
High and trade schools, Development of foundry courses in . . . 332-336
High frequency induction furnace for melting aluminum 143
High-phosphorus gray cast iron, Machinability of . . . 282
Hiring of personnel . . . 376
Hot chamber die casting machine . . . 398
Hot tears in castings . . . 300
Hot tests on sand . . . 453
Hot toughness of green sand . . . 459
Hydrogen, Influence of, on solid steel . . . 203

I

Ignitor, Electric coke . . . 65
Immersion test for steel penetration into molding sand . 37
Impact, Testing of sand under . . . 451-461

Inclusions in gray iron . . . 131
Induction melting gray iron, Air oxidation during . . . 476
Induction melting of cast iron . . . 126
Industrial research, Management of . . . 1
Industry participation in secondary school training program for the foundry . . . 376-380
Ingot remelting, Aluminum . . . 145
Inoculation of gray iron . . . 353, 401
Inspection of malleable iron castings, Equipment and methods of straightening and dimensional . . . 418-424
Insulating riser sleeves . . . 394
Investment casting, Precoat materials for . . . 315-322
Iron, cast, Kinetics of graphitization in . . . 181
Iron castings, Silicon-chromium alloy in complicated . 401-411
Iron oxide additions, Effect of, on composition of gray iron 478
Isothermal transformation characteristics on direct cooling of alloyed white iron . . . 509-522

J

Jobbing foundries, Evaluating costs in . . . 210

K

Keel block . . . 338
Kinetics of graphitization in cast iron . . . 181

L

Ladle refractories and practice in acid electric steel foundry . . . 546-554
Losses, Core practice as related to malleable foundry . 300-308
Low-frequency induction melting furnace . . . 143

M

Machinability of high-phosphorus gray cast iron . . . 282
Magnesite brick in basic cupola . . . 24
Magnesium alloys:
  Die casting . . . 398-400
  Melting of . . . 139
Magnesium melting:
  and refining . . . 398
  in crucibles . . . 148
  in reverberatory furnace . . . 149
  Open-pot method of . . . 147
Magnesium-rare earth sand casting alloys, A castability and property comparison of several . . . 532-545
Magnetic particle tests . . . 311
Magnetite in slag . . . 128, 129
Malleable cast iron—annealing furnaces and atmosphere 494-500
Malleable foundry losses, Core practice as related to . 300-308
Malleable iron castings, Equipment and methods of straightening and dimensional inspection of . . . 418-424
Malleable iron, Relative effects of chromium and silicon contents on rate of anneal of black-heart . . . 244
Management of industrial research . . . 1
Mass, Mechanical properties of cast steel as influenced by 223
Mechanical properties and structure of a Mo-Ni-Cr cast iron . . . 353-359
Mechanical properties of a nodular cast iron, Effect of phosphorus content on . . . 501-508
Mechanism of gamma-range graphitization of gray iron 184, 185
Mechanism of metal penetration . . . 114
Mechanism of steel penetration in sand . . . 53, 54
Mechanization of gray iron foundry . . . 56
Melt quality and fracture characteristics of 85–5–5–5 and 88–8–4 alloys . . . 67
Melting:
  aluminum and magnesium-base alloys . . . 139
  and refining magnesium . . . 398
  copper alloys, Equipment for . . . 465
  gray iron, Mechanization in . . . 63
  gray iron under CO, Effect of . . . 482
  gray iron under slag, Effect of . . . 481
  magnesium alloys . . . 146
  malleable iron . . . 244
  of 85–5–5–5 brass . . . 361
  variables, Some effects of temperature and, on chemical composition and structure of gray irons . . . 472-487
  white iron . . . 509
Metal penetration . . . 108
  Determination of, in sand molds . . . 253
  Mechanism of . . . 114
Metallographic examination of gray iron . . . 404-410
Metallography and crystallography of graphite . . . 182
Metallurgical blast cupola . . . 25
Methods of straightening and dimensional inspection of malleable iron castings . . . 418-424
Michigan dune sand . . . 412
Micro-examination of cast steels . . . 262, 266, 267
Microstructure of:
  alloyed white iron . . . 510, 514-516, 519, 520
  gray iron . . . 432
  magnesium-rare earth alloys . . . 538
  Mo-Ni-Cr cast iron . . . 354, 355, 357, 358
  nodular cast iron . . . 504-506
Misruns and cold shuts in malleable castings . . . 303
Modification of aluminum-silicon alloys . . . 28
Molasses-bonded sands . . . 454
Molding equipment for gray iron foundry . . . 59
Molding materials, Nonferrous . . . 350
Molding sands, Compaction studies of . . . 291-295
Molds, Drying of . . . 10
Mo-Ni-Cr cast iron, Structure and mechanical properties of . . . 353-359

N

Nickel, Effect of 2 per cent, on 5 Pb-Cu alloy . . . 363
Nitrogen, Degassing copper-base alloys with . . . 74
Nodular cast iron . . . 337-347
  Effect of phosphorus content on mechanical properties of . . . 501-508
  Photomicrographs of . . . 504-506
Nodule counts in malleable iron . . . 247
Nondestructive testing, Equipment for . . . 309-314
Nonferrous development program, U. S. Navy . . . 348-352

O

Oil-bonded sands . . . 454
Oil, Core, evaluation method . . . 276-281
Open-pot method of magnesium melting . . . 147
Outline for foundry training courses . . . 333
Oxidation reactions in melting iron . . . 121
Oxidation-reduction principles controlling composition of molten cast irons . . . 121

P

Penetrant tests . . . 313
Penetration and rough surfaces . . . 302
Penetration in sand molds, Determination of metal . . . 253
Penetration of steel:
  Factors which counteract . . . 50
  Factors which favor . . . 49
  Immersion tests for . . . 37
  Mechanism of . . . 53, 54
  Rate of . . . 53
  Resistance to . . . 53
Penetration of steel, Effect of:
  binders and admixtures in sand . . . 45
  chemical reactions at steel:sand boundary . . . 48
  composition of the molten metal . . . 44
  grain size and grain distribution of the sand . . . 44
  moisture content of the sand . . . 46
  mold washes on . . . 46
  permeability of the sand . . . 46
  preheating of the sand . . . 47
  ramming density . . . 46
  sintering point . . . 36
  static pressure of molten metal . . . 36, 43
  temperature of molten metal . . . 43
  thermal diffusivity of the sand . . . 46
  time factor . . . 42
Personnel, Hiring of . . . 376
Petrographic examination of slag . . . 128, 129
Phosphorus content, Effect of, on mechanical properties of a nodular cast iron . . . 501-508
Photomicrographs of:
  alloyed white iron . . . 510, 514-516, 519, 520
  gray cast and nodular iron . . . 338-339

magnesium-rare earth alloys . . . 538
metal penetration . . . 111-113
nodular cast iron . . . 504-506
Plugs, Manufacture of bronze boiler drop . . . 296-299
Polymerization of resin bond . . . 412
Pots, Melting, for aluminum . . . 144
Precoat materials for investment casting . . . 315-322
Preheating of sand, Effect of, on penetration of steel . . 52
Pressure testing of gray iron castings . . . 304-308
Projects, Nonferrous development . . . 349

R

Radiographic examination of castings . . . 351
Radiographic studies on cast steel . . . 171
Radiography . . . 309
as an assistant to foundry practice . . . 151-158
Rare earth alloys, Analysis of . . . 534
Rare earth-magnesium sand casting alloys . . . 532-545
Red brass, 85–5–5–5, Fracture characteristics and melt quality of . . . 67
Refining secondary copper alloys . . . 465-471
Refractories:
Drying and preheating . . . 549
Installation of . . . 549
Ladle, and practice in acid electric steel foundry . 546-554
Refractory:
consumption in basic cupola . . . 24
cost and maintenance in basic cupola . . . 329
technique in basic cupola . . . 24
type, Effect of, in melting gray iron . . . 476
Remelting aluminum ingot, Effect of temperature and holding time in . . . 145
Research activities:
classified . . . 2
Financing of . . . 5
Research defined . . . 1
Research director, Functions of . . . 3
Research group, Operation of . . . 4
Research, Management of industrial . . . 1
Research, Origin of . . . 2
Resin-bonded sands . . . 453
Resin core:
binders . . . 160
mixes . . . 163
Reverberatory furnaces and melting:
aluminum . . . 140
magnesium . . . 149
Riser and casting end effects on soundness of cast steel bars 171
Riser efficiency:
defined . . . 393
Increasing . . . 392-397
Risering fundamentals . . . 392
Rust, Effect of, on analysis of gray iron melt . . . 479

S

Sampling of ladles . . . 85
Sand:
Core, practice . . . 412-417
dryer . . . 57
fineness number . . . 117, 118
grain distribution, Effect of, on casting finish . . 523-528
handling layout . . . 61-63
Molding, preparation . . . 60-63
Testing of, under impact . . . 451-461
Sands:
Compaction studies of molding . . . 291-295
Molasses-bonded . . . 454
Oil-bonded . . . 454
Resin-bonded . . . 453
Sieve analyses of silica . . . 117
Sampling, Method of, molten copper alloys for analysis . 466
Sawdust in cores, Objections to . . . 301
Scab defect on gray iron castings . . . 99
Scabs on gray iron castings:
Cause of . . . 100
Cure for . . . 101
Foundry conditions that promote . . . 106
Scaling and growth tests for nodular iron . . . 342
School, secondary, training programs for the foundry, Industry participation in . . . 376-380
Scum formation on surface of molten gray iron . . . 473
Sea coal, Effect of, in solidification of gray iron . . . 431
Secondary copper alloys, Refining . . . 465-471
Second-stage annealing of malleable iron . . . 249
Segregation, Mechanical properties of cast steel as influenced by . . . 223
Shrinks in malleable castings . . . 302
Sieve analyses of silica sands . . . 117
Sieve shakers for sands . . . 117-119
Silica reduction in gray iron melting . . . 126
Silica sands, Sieve analyses of . . . 117
Silicate inclusions in gray iron . . . 131
Silicon-chromium alloy in complicated iron castings . . 401-411
Silicon content, Influence of, on mechanical and high temperature properties of nodular cast iron . . . 337-347
Silicon, Effect of, on annealing rate of malleable iron . . 244
Silicon loss in cupola . . . 22
Silicon pickup in melting iron . . . 121, 134
Sintering point, Effect of, on steel penetration into sand 36
Slag analysis, Cupola . . . 476
Slag and metal reaction in basic cupola melting . . . 323
Slag control in basic cupola operation . . . 323-331
Slag, Dry, formation on surface of molten gray iron . 473, 475
Slag over molten gray iron, Influence of type of . . . 476
Slag phase in gray iron melting . . . 128
Sodium chloride-fluoride, Modification of aluminum-silicon alloys by . . . 29
Sodium metal, Modification of aluminum-silicon alloys with 31
Solidification of:
castings . . . 381
gray iron in sand molds . . . 425-434
steel against sand and chill walls . . . 435-450
steel, analogue method of study . . . 446-447
Solubility of carbon in molten iron . . . 26
Specification sheets and their various uses . . . 372-375
Static pressures, Effect of, on steel penetration into molding sand . . . 36
Steam treatment of molten gray iron, Effect of . . . 482
Steel bars, cast, Riser and casting end effects on soundness of . . . 171
Steel, cast, Mechanical properties of, as influenced by mass and segregation . . . 223
Steel, Effect of vanadium on properties of cast Cr-Mo . . 261
Steel, Penetration of, into molding sand . . . 35
Steel, Solidification of, against sand and chill walls . . 435-450
Strain cracks . . . 301
Stopper and nozzle assembly for bottom-pour ladle . . . 551
Structure and mechanical properties of a Mo-Ni-Cr cast iron . . . 353-359
Structure of gray irons, Some effects of temperature and melting variables on chemical composition and 472-487
Sulphur dioxide in melting magnesium . . . 398
Sulphide inclusions in gray iron . . . 131
Sulphur removal in cupola from iron . . . 21

T

Technical trainee, Absorbing the . . . 462-464
Temperature and melting variables, Some effects of, on chemical composition and structure of gray iron 472-487
Temperature control in melting:
aluminum alloys . . . 146
copper alloys . . . 466
magnesium alloys . . . 149
Temperature of molten bronze . . . 350
Testing sand under impact . . . 451-461
Thermal analysis of cast steels . . . 262
Thermal conductivity defined . . . 381
Thermal considerations in foundry work . . . 7
Thermal shock resistance of dolomite . . . 24
Thermal studies . . . 173
Methods of making . . . 11
with heat and mass flow analyzer . . . 13
Tilting ladle, U-type, for gray iron . . . 65
Tilting reverberatory furnace for melting aluminum . . 142
Timestudy fatigue factor . . . 92

Trade and high schools, Development of foundry courses in 332-336
Trainee, Absorbing the technical 462-464
Training course outline for foundry 333
Training programs 463
Training programs for the foundry, Industry participation in secondary school 376-380
Transformation characteristics, Isothermal, on direct cooling of alloyed white iron 509-522
T-T-T diagrams for alloyed white iron 513

U

Ultrasonic or acoustical tests 313
U. S. Navy nonferrous development program 348-352
U-type tilting ladle 65

V

Vanadium, Effect of, on properties of cast Cr-Mo steels . 261

W

Water cooling of cupola 25
Wedge tests for gray iron 81
Weigh lorry for weighing cupola charge 64
White iron:
alloyed, Composition of 510
alloyed, Isothermal transformation characteristics on direct cooling of 509-522
Freezing of, in green sand molds 488-493
melting 509
photomicrographs 510, 514-516, 519, 520
85-5-5-5
alloy, Cooling curves of high purity 366
red brass fracture characteristics and melt quality . . 67
impurities in 361
88-8-4, bronze, Fracture characteristics and melt quality of 67
80-10-0-2 bronze, Continuous cast, macroetch showing coarse columnar grains 360

AUTHOR INDEX

A.F.S. Committee Reports—
Chill Tests and the Metallurgy of Gray Iron . . . 79
Fatigue Data Summary—Report No. 2 . . . 9
Metal Penetration . . . 108
Scab Defect on Gray Iron Castings . . . 9
A.F.S. Research Reports—
Melt Quality and Fracture Characteristics of 85-5-5-5 Red Brass and 88-8-4 Bronze . . . 61
